

WE ARE HIRING:

Automation and Software Development Specialist (m/f/d) for Hydrogen Intralogistics Systems

We are looking for an ambitious full-time expert in Germany, Austria or Italy.

Your tasks

- Plan and create concepts for automation solutions for our systems
- Design and implement bus structures and network topologies
- **Program Siemens Simatic S5 and S7 controllers (Step5 / Step7)**
- **Develop visualization solutions using ProTool, WinCC, WinCC Flexible, and Wonderware InTouch**
- Create and maintain database connections for operational data acquisition
- Take responsibility for control cabinet planning
- Coordinate cabinet assembly with our partner companies
- Conduct loop tests and system commissioning
- Handle service and maintenance of our systems
- Ensure high system availability through your technical expertise
- Ensure continuous system support through flexible availability
- Support our service team in proactive customer care
- Develop predictive maintenance concepts for maximum system availability
- Work closely with our interdisciplinary team

Your profile

Educational background and required technical know-how

- Technical degree (HTL, University of Applied Sciences, or equivalent) in automation technology, electrical engineering, or a related field
- **Specialist expertise in programming Siemens Simatic S5 and S7 controllers**
- **Extensive experience with various visualization systems (ProTool, WinCC, WinCC Flexible, Wonderware InTouch)**
- **Knowledge on functional safety according to IEC 61508 Standard**
- In-depth knowledge of implementing industrial bus structures
- Experience in control cabinet planning and project engineering
- Understanding of the relationships between control technology, databases, and process visualization

Personal skills

- Analytical thinking and structured work approach
- Flexibility and solution-oriented mindset, even in dynamic situations
- Strong service orientation and sense of responsibility
- Readiness to provide competent support for time-critical customer requests
- Strong team communication skills
- Fluent in German and English
- Willingness to travel for commissioning and service assignments

Your benefits

- Exciting projects in a future-oriented technology sector
- Advanced development frameworks and tools
- Modern remote support tools for efficient problem solving
- Regular training for your personal development
- Competitive, performance-based compensation
- Attractive remuneration for on-call duties and assignments outside regular working hours
- A dynamic team with flat hierarchies
- Flexible working hours and home office options
- Attractive social benefits

Does this sound like your next challenge? We look forward to receiving your application, including your CV and relevant certificates!

Join Wolftank Group - Shaping the future of clean mobility and environmental innovation.

Wolftank Group is a global pioneer in environmental remediation and sustainable refueling solutions. We specialize in remediating contaminated sites, ensuring environmental compliance and developing state-of-the-art infrastructure for zero-emission mobility. With operations in over 20 countries and subsidiaries on three continents, we are at the forefront of decarbonizing transportation - delivering turnkey hydrogen and LNG fueling systems that are driving the energy transition. Headquartered in Innsbruck, Austria, Wolftank Group combines technical expertise with a passion for sustainability. Our team thrives on innovation, precision and impact, working together to create a cleaner future. If you are looking for a career where your work contributes to a greener planet, contact us!
