

## Wolftank Group to install more than 400 e-charging stations in Italy

- More than 100 highly frequented locations for new fast-charging stations
- Orders of over EUR 2.5 million from framework agreements amounting to approx. EUR 4 million

Wolftank Group (Wolftank-Adisa Holding AG, ISIN: AT0000A25NJ6), specializing in technologies for energy and environmental solutions, has signed cooperation agreements with several leading e-mobility providers in Italy to install over 400 mainly fast charging stations. The first e-charging stations have already been successfully set up and put into operation. Numerous others will be installed in the coming months at around 115 high-traffic locations such as freeway service areas, train station parking lots, service stations and public areas.

The Group is thus taking advantage of the high potential offered by the e-mobility sector and applying its long-standing expertise in the expansion of zero-emission refueling infrastructure. Revenues of around EUR 4 million are expected for these projects. In addition, the development of the sector and the expertise gained in electric charging systems offer new opportunities for the installation of further e-charging stations in Italy, Spain and the EU. Wolftank Group sees its strategy confirmed and has created an optimal basis for future development in the e-mobility sector with the investment in the Italian company Mares, which is part of the group via a joint venture with Kuwait Petroleum Italia.

*"We have been able to make well-targeted use of our know-how as well as our network in Italy to win important contracts in the field of e-mobility. The expansion of e-charging infrastructure is a worldwide need and will continue to offer us good potential in the future. Our goal is to become a key pillar for zero-emission vehicle refueling and to build the infrastructure for the mobility of the future, be it e-mobility or hydrogen. The orders we have won give us the opportunity to consolidate and further expand our market position",* says Peter Werth, CEO of the Wolftank Group.
