

Press release

Innsbruck, 19.4.2022

DRK 32 becomes Wolftank Germany

The German subsidiary of the Wolftank Group, DRK 32, will become "Wolftank Deutschland" as of today. DRK 32 has been part of the group for four years and until now specialized in the production of double-walled pipes, tank coatings and inner tank shells. In future, in addition to the double-walled pipes named DRK 32, the company will also market the entire product and service range of the Wolftank Group in Germany. This includes full services and certified refueling technology for service stations with conventional fuel, LNG or hydrogen. In the area of environmental solutions, the range includes environmental due diligences, customized services for soil and water remediation as well as waste management.

"The new name Wolftank Germany is symbolic for the future and further development of our subsidiary. We see strong market potential in Germany, which we want to fully exploit going forward. Our group's range is focused on products and services for the energy systems of tomorrow. With our three decades of experience, we are actively contributing to decarbonizing transport and building the infrastructure for zero-emission mobility. More than ever, these services are needed. Therefore, this is the right time for us to take off as Wolftank Germany," says Peter Werth, CEO of Wolftank Group.

The legal company name of DRK 32 GmbH will change to Wolftank Deutschland GmbH. With a new logo, a new design and a new website www.wolftank.de, the company is available to its customers with an expanded range of products and services. The previous products and services of DRK 32 remain a fully integrated part of the product range and will also be marketed in the other countries of the Wolftank Group.

About Wolftank Group

Wolftank Group is a leading technology partner for energy and environmental solutions operating worldwide. In the field of energy mobility and logistics, the Group supports customers in more than 20 countries to implement projects in an efficient and environmentally friendly way. For this, it develops and implements tomorrow's technologies to decarbonize transport and build the infrastructure for zero-emission mobility - such as turnkey delivery of modular hydrogen and LNG refueling facilities. In the area of environmental solutions, the offering includes due diligences for environmental risks, customized services for soil and groundwater remediation, as well as recycling. The group's subsidiaries in eight countries on three continents are managed by Wolftank-Adisa Holding AG, based in Innsbruck, Austria. The share of Wolftank-Adisa Holding AG (WKN: A2PBHR; ISIN: AT0000A25NJ6) is listed in the direct market plus segment of the Vienna Stock Exchange AG and in the m:access of the Munich Stock Exchange and is traded on Xetra, the Frankfurt and Berlin Stock Exchanges.
