

WOLFTANK H₂ SCALABLE STATION

HIGH-END SCALABILITY:

Modular & efficient upgrades based on changing demands.

SOPHISTICATED DESIGN:

Suitable for a wide array of compressors and storage solutions, available in both 350 and 700 bar versions.

GREAT VERSATILITY:

Elevate your refueling capabilities with the option to integrate a high-capacity pneumatic compressor up to 920 bar.

ONE PRODUCT TO
MANAGE A COMPLETE
REFUELING STATION

The Woltank H₂ Scalable Station is a modular, semi-mobile refueling solution for all types of hydrogen vehicles that can be upgraded to meet evolving needs.

Thanks to its unique modularity and high performance, it is virtually unrivaled by a small stationary refueling system and requires minimal civil works. This technology features a versatile connection and control system, specifically designed to adapt to changing demand.
